
Juan Sebastián Galvis Chacón

juansebas0729@gmail.com — +34 603 28 62 53 — Madrid, Spain

Profile

Data Analyst with a strong background in Physics and Machine Learning, currently working on real-world business optimization problems through econometric modeling and data analysis. Experienced in transforming complex datasets into actionable insights to support strategic decision-making. Particularly interested in applying quantitative and analytical skills to improve operational efficiency, forecasting and decision-making in complex environments.

Academic Background

Master's Degree in Big Data, Data Science and Artificial Intelligence, Complutense University of Madrid 2025 – 2026

Bootcamp in Applied Technology and Business Intelligence, International University of La Rioja 2025 – 2026

Bachelor's Degree in Physics, University of Zaragoza 2020 – 2025

- Bachelor's Thesis: *Neural networks applied to an economics problem.*
- Erasmus+ exchange at Università degli Studi di Torino (2023–2024)

Professional Experience

Data Analyst — Annalect (Omnicom Media) 2025 – Present

- Developed econometric and statistical models (Marketing Mix Modeling) to evaluate campaign performance and optimize media investment.
- Analyzed large-scale datasets to extract actionable insights supporting strategic and data-driven decision-making.
- Built interactive dashboards in Tableau for KPI monitoring and business performance tracking.
- Applied quantitative methods to improve resource allocation and optimize complex business processes.

Waiter, Tahona Milagrosa Café (Pamplona) 2020 – 2025

Technical Skills

- **Programming:** Python, C/C++, R, Bash, LaTeX
- **Data Analysis & Machine Learning:** Supervised and unsupervised learning, feature engineering, model selection and evaluation, forecasting, regression models, decision trees, Random Forest, Gradient Boosting, XGBoost, neural networks (MLP, CNN, RNN), NLP.
- **Statistical & Mathematical Methods:** Linear algebra, probability, statistics, optimization, dimensionality reduction (PCA), clustering, time series (ARIMA)
- **Libraries & Tools:** scikit-learn, TensorFlow / Keras, NumPy, pandas, matplotlib, Tableau, OpenCV, Pytorch
- **Systems & Environments:** Linux, Git
- **Databases:** SQL, NoSQL (MongoDB)

Languages

- Spanish — Native
- English — C1

Volunteering

- **Elderly care home** (2019)
